About Us

Forms and Functions Development Corporation, also known as “FFDC” takes construction and architecture to its foundation – the basic shapes. Through these basic shapes, we create strong foundations and design structures, big or small, giving life and function to the spaces we construct. Our team comprises technical professionals with years of experience, skills, and knowledge, making our output reliable and quality. We cater to a wide range of clients from various industries. Showcasing a diverse portfolio of projects including Industrial, Residential, Showrooms, Commercial Fit outs, Offices, Institutional and Hospitality.

Core Values

We value each of our clients, and their satisfaction is our goal. We maintain good communication to know what our clients need and combine them with high-quality services to achieve client satisfaction and even exceed.

Vision

We envision becoming the partner of choice of businesses from varying industries nationwide with any of their construction needs. We aim to do this by continuously providing the highest quality construction services, adapting to change, and evolving to improve our services.

Mission

We thrive when our clients are satisfied with our services. Our goal is to continue to build long-lasting relationships with our clients based on integrity, reliability and quality results in providing them with our services.

**“Shaping form
with function”**

History

2004

Forms and Functions was founded in 2004 by our Principal Architect Efren Balisi . It was initially named **Forms and Functions Architectural Services**, specializing primarily in design services.

2005

During 2005 we entered the **Motorcycle Showroom Industry and mall fit-outs** with the Construction of Transcycle outlets. We have been a significant player in motorcycle retail construction and fit-outs through the years. The company continued **completing over 100 showrooms, outlets, and service centers** for brands like Yamaha, Honda, Suzuki, and Kawasaki throughout Luzon, Visayas, and Mindanao.

In 2011, the company changed its name to **Forms and Functions Development Corporation (FFDC)** and focused more on Construction. We specialize in General and Specialty Construction. Our Clients hire us as contractors, and now we cater secondary to Design Services.

2011

In 2015, FFDC entered the **large Warehouse Construction and Industrial projects** such as Power Plants. Starting with UCFC Warehouse and Motor Service building in Sto. Tomas.

2015

Present

Now, FFDC is committed to designing and constructing High-End Residential homes, Hotels, Office fit-outs, Mall fit-outs, Fast Food Restaurants, Warehouses and Power Plants and more.

Also, FFDC leads Specialty Construction such as Modular Warehouse Assembly, Fire Protection and Suppression Systems, Fire Alarm Systems, CCTV, and BMS.

Companies Who Trust Us
